Mern Stack Developer

House#4, Street#5, Ghosia  
Colony, Shera Kot, Lahore.

## ABOUT ME

I specialize in MERN stack development and am a proficient, modern web developer. I have extensive expertise in NoSQL databases using MongoDB, hands-on experience with Express.js for API development, React.js for building dynamic and interactive user interfaces, and Node.js for efficient server-side runtime. My comprehensive skill set enables me to build scalable and high-performance web applications.

## EXPERIENCE

### Bubble.io

**Feb(2023) - June(2023)**

- During my tenure working with Bubble.io, I honed my skills in building dynamic web applications without writing a single line of code.
- This powerful no-code platform enabled me to swiftly prototype, design, and deploy fully functional web solutions.
- I became proficient in utilizing its intuitive drag-and-drop interface to create custom workflows and interactive features, streamlining complex development processes.

### MERN STACK

#### Technologia Hub

**Sep(2023) - July(2024)**

- Currently working as a Junior MERN Stack Developer, where I am gaining hands-on experience with MongoDB, Express.js, React.js, and Node.js technologies.
- I am actively contributing to real-world projects, such as **CallerTech** (<https://callertech.com/>), by developing and maintaining full-stack applications.
- I am continuously enhancing my full-stack development skills through practical application and ongoing learning.
- I collaborate effectively within a dynamic team, consistently improving my communication and teamwork skills.

### MERN STACK

#### Desol Int

**July(2024) - Present**

- Worked as a MERN Stack Developer, responsible for building and maintaining full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Developed RESTful APIs and dynamic frontends and Implemented state management using Redux.
- I'm Collaborated on the projects, focusing on compliance reporting and user role management. .
