Mern Stack Developer

House#4, Street#5, Ghosia
Colony, Shera Kot, Lahore.

ABOUT ME

I specialize in MERN stack development and am a proficient, modern web developer. I have extensive expertise in NoSQL databases using MongoDB, hands-on experience with Express.js for API development, React.js for building dynamic and interactive user interfaces, and Node.js for efficient server-side runtime. My comprehensive skill set enables me to build scalable and high-performance web applications.

- TODO LIST etc...

EXPERIENCE

Bubble.io

Feb(2023) - June(2023)

- During my tenure work with Bubble.io, I honed my skills in building dynamic web applications without writing a single line of code.
- This powerful no-code platform enabled me to swiftly prototype, design, and deploy fully functional web solutions.
- I became proficient in utilizing its intuitive drag-and-drop interface to create custom workflows and interactive features, streamlining complex development processes.

MERN STACK

Technologia Hub

Sep(2023) - July(2024)

- Worked as a Junior MERN Stack Developer, where I am gained hands-on experience with MongoDB, Express.js, React.js, and Node.js technologies.
- I am actively contribute to real-world projects, such as **CallerTech** (<https://callertech.com/>), by developed and maintained full-stack applications.
- I am continuously enhancing my full-stack development skills through practical application and ongoing learning.
- I collaborate effectively within a dynamic team, consistently improving my communication and teamwork skills.

MERN STACK

Desol Int

July(2024) - Present

- Currently working as a MERN Stack Developer, responsible for building and maintaining full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Developing RESTful APIs and dynamic frontends and Implement state management using Redux.
- I'm Collaborating on the projects, focusing on compliance reporting and user role management. .
